

The second largest country by land is _____

The second largest country by land is _____

a) Russia

b) China

c) Canada

d) USA

Russia is the largest country of the world by land area, It has a total land area of 16376870 square kilometer. China, with a total land area of 9388211 square kilometer, is the second largest country by land area.

Remember Total land area= land area + water bodies (lakes, reservoirs, rivers)

When we consider total area wise largest countries then Russia is at the top and Canada is second on the list.
