

What is the full form of CSS?

A. Central Styles Sheets

B. City School system

C. Cascading Style Sheets

D. Cyber Super System

Explanation:

The full form of CSS is the Cascading Style Sheets. So, **CSS stands for Cascading Style Sheets.**

According to [Wikipedia](#),

Cascading Style Sheets (CSS) is a style sheet language used for describing the presentation of a document written in a markup language like HTML.[1] CSS is a cornerstone technology of the World Wide Web, alongside HTML and JavaScript.[2]

CSS is designed to enable the separation of presentation and content, including layout, colours, and fonts.[3] This separation can improve content accessibility, provide more flexibility and control in the specification of presentation characteristics, enable multiple web pages to share formatting by specifying the relevant CSS in a separate .css file and reduce complexity and repetition in the structural content.
