

What is the full form of WWW?

A. Web World Wide

B. World Wide Web

C. Wide World Web

D. White World Web

Explanation:

The full form of WWW is the World Wide Web. WWW is a unification of all resources and users on the Internet that are using the Hypertext Transfer Protocol (HTTP). A broader definition comes from the World Wide Web consortium. So, **WWW stands for World Wide Web.**

According to [Wikipedia](#), The World Wide Web (WWW), commonly known as the Web, is an information system where documents and other web resources are identified by Uniform Resource Locators (URLs, such as <https://www.example.com/>), which may be interlinked by hypertext, and are accessible over the Internet. The resources of the WWW are transferred via the Hypertext Transfer Protocol (HTTP) and may be accessed by users by a software application called a web browser and are published by a software application called a web server.
