

What is the name of the first animal in outer space?

What is the name of the first animal in outer space?

a) Laika (dog)

b) Monkey

c) Mice

d) none of these

Laika, a Russian street dog, was the first animal to enter orbit on November 3, 1957. There was no re-entry plan so Laika had died in space. The spaceship which carried Laika was Sputnik 2.
