

Which European country becomes first to ban AI program ChatGPT?

Which European country becomes first to ban AI program ChatGPT?

- a) Germany
- b) France
- c) Italy**
- d) Greece

ChatGPT is an artificial intelligence (AI) program which is developed by OpenAI, and is considered to be a game changer. ChatGPT stands for “Conversational Generative Pre-training Transformer”. This program is capable of generating human-like responses by going through a large amount of data. It was launched in November 2022. Italy has imposed ban on it over privacy concerns.
